Representative Meyers' Response to Governor Walker's Budget Plan on Rural Broadband

"It is very important that the upcoming budget contain significant investments in schools, access to broadband and other issues that matter to rural Wisconsin. While Governor Walker's stated budget plans appear to be a good starting point, I am eager to see more details when he unveils his full budget next week."

"I look forward to working throughout the budget process with the governor and my legislative colleagues on ways that we can provide high-quality services to rural communities in the 74th District and across the state."
